

Classic 2 GS container

Textiles collection container

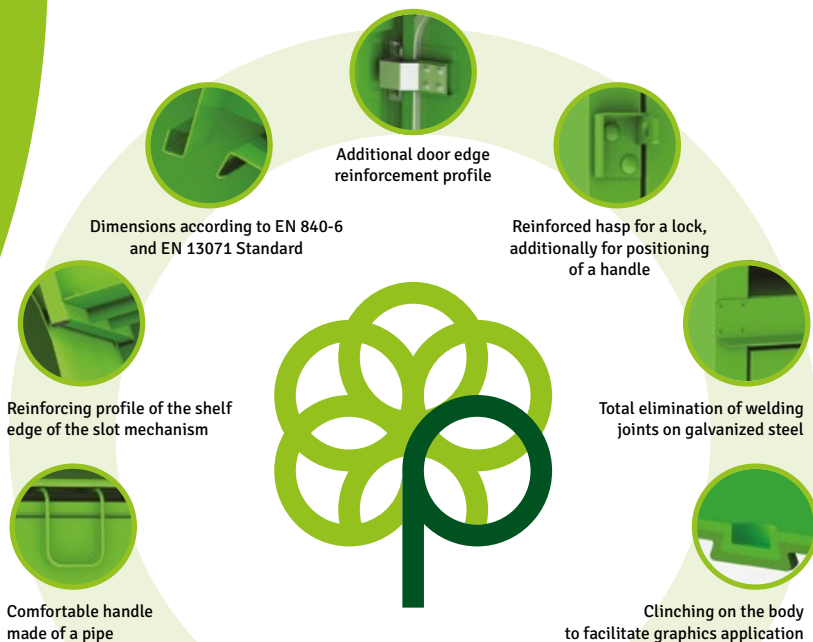

The container has been tested for safety and quality in DEKRA technical laboratories in Stuttgart and received the GS certificate (Geprüfte Sicherheit). The container is made in accordance with the machinery directive 2006/42 / EG and has the CE mark.

Anti-corrosion protection

Galvanized sheet metal and powder coating perfectly protect the container against weather conditions. Additional profiles and accessories are hot-dip galvanized.

Product features

The container is configurable. We can flexibly adjust it to your needs. The scope of the configuration includes: height, sheet thickness, roof shape, foot type, and the method of closing. All of this is within the scope of our GS certification.

Container feature	Available option		
Sheet thickness	1,0 mm	1,2 mm	1,5 mm
Height	2,0 m	2,1 m	2,2 m
Roof shape	Trapezoid	Round	Single-sided
Locking	PL handle	Cylinder lock	
Feet	Regulated PVC	Non-regulated metal
